🧠 About Me

Versatile specialist focused on implementing and integrating AI into digital products. I build websites, apps, and interfaces, and create projects using modern AI tools. I learn fast, adapt easily, and continuously expand my skill set. Ready to take ownership of tasks that require flexible thinking and a creative approach.

💼 Core Skills

- Web design & prototyping (HTML, CSS, JS, React, Tailwind)

- AI assistant development (LangChain, LLM integrations, APIs)

- UI/UX design (Figma, animations, responsive & emotional design)

- AI integration (OpenAI, Gemini, Claude, Mistral, local models)

- MVP development with scaling potential

- Prompt engineering and AI agent setup

- System architecture: from local to cloud deployments

- Automation with AI and scripting (Python, Bash, no-code & low-code)

- Containerization (Docker: dev & prod environments)

- AI adoption consulting for businesses

- Branding, marketing & copywriting (AI-assisted and manual)

🚀 Current Focus

🤖 AI & Digital Development

Building interfaces, integrating AI, local/cloud prototypes, agent configuration, and automation. Special focus on emotional design and custom AI behavior.

🎯 Prompt Expert

Creating a prompt library and AI workflows for generating content, code, marketing, automation, and assistants.

🧩 Flexible Competencies

- Analytical and systems thinking

- Quick tech adaptation

- Meeting deadlines under pressure

- Detail-oriented while keeping the big picture

- Independent and collaborative work

- Workflow design (AI-assisted and manual)

📚 Goals & Interests

- Growing in IT, especially AI for business optimization

- Working on real-world projects from UI to agent logic

- Taking on projects that encourage learning by doing

- Contributing to innovative tools, assistants, and services
